Mines and Mining Stocks

MONTPELIER COPPER MINES

RICH ORE.

(Special to The Herald.) cles are on the eve of expectancy in this hills right back of the Nevada Consol owning claims near this city, has deter- Nev., is in the market today with th wining claims near this city, has determined to open up their property on a large scale. This week they installed a forty-horsepower gasoline hoist, and with it are putting in an electric plant, air compressor and other necessary machinery to sink 600 feet on the property. The shaft is already down, 150 feet, and as soon as the hoist and pump are in place the work of sinking will be pushed as fast as money and men can do it. The lead they intend to tap carries copper, silver and some gold. There is some water in the shaft now, and this water carries a good per cent of the limit carried in galena, which is the character of this rock. The first shipment went 68 per-cent lead. The ore brings a premium of \$2.50 a ton at the smelter and the lot, under the present of the carboad. Another carboad lot is melter and the lot, under the present settling basis for lead and silver, will net the company about \$50 a ton, or \$1,500 for the carload. Another carboad lot is will soon be on the market.

The carload which is now being settled for has been several weeks in transit from McGill. At the time it was due here all trace of the car in which it was shipped was lost and it was some time before it was traced into Wyoming and finally located at Evanston. The car was so long machinery is in place the development will be confined to the shaft. The lead has been opened in many places along the vein, and everywhere the ore shows values of from 10 to 40 per cent copper, with an average of 20 ounces in silver.

Big Money Behind It. mined to open up their property on a second carload of lead ore from that prop

Big Money Behind It.

This belt of claims has been worked in haphazard tashion for many years, but until now the development has not taken into account any permanent work. The company behind the proposition is composed of eastern capitalists, and representatives of these have gone over the ground carefully and given it a high recommend. On their report money was immediately put up for a fine holts and all that goes with it, and there are also ample funds on hand to push the word to a finality and demonstrate once and for all whether the copper belt will prove what many have long since claimed for it, and that is that it is one of the liggest and richest propositions in the west. Other companies operating in the west. Other companies operating in the water months, so that before spring they where months, so that before spring there will probably be several shipping propositions adding their quota of wealth to the nation's supply.

Shipping From the Collett.

At Cokeville, thirty miles east of this city, the old Collett property has been purchased by a new corporation and they have orgened up a fine body of ore and already shave more than 30 tons on the dump ready for shipment. The fact that this ore has to be hauled twenty-free miles before reaching the railroad, and the fact that this ore has to be hauled twenty-free miles before reaching the railroad, and the fact that the owners have already contracted with several owners of teams to haul all winter, goes to show that to had all winter, goes to show that the fact that the owners have already contracted with several owners of teams to haul all winter, goes to show that the fact that the owners have already contracted with several owners of teams to haul all winter, goes to show that the fact that the owners have already contracted with several owners of teams to h This belt of claims has been worked in haphazard fashion for many years, but

the fact that the owners have already contracted with several owners of teams to haul all winter, goes to show that not only is the ore very rich, but that there is plenty more where the 300 tons came from. This is another copper proposition carrying gold and silver. It is said that the cre as sorted ready for hauling will go 40 per cent in copper, with good values in the other metals. The property has been worked, off and on, for many years, but lack of capital on the part of former owners prevented them from developing the property as it is now. The present owners have spent a mint of money developing the claims, building a twenty-five-mile wagon road through the mountains, and otherwise placing the property in a position where it could be made to pay.

Altogether, everything looks mighty herebyte for the wining men of this viscous that the owners have already some that daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, a feature that has just been added by James A. Poliock & Co. to its private wire service, and from which it is secured for use in this department of The Herald:

Boston, Nov. 13.—Considerable selling of North Butte came from New York and the stock ran off easily to 37½, with a rally later to 38. Rumors of passing the dividend are causing considerable short selling in this stock and we expect to see them get squeezed. Calumet & Ari-

DOINGS OF UNLISTED STOCKS ON EXCHANGE

Ohio Copper was sold at \$2.10 and \$2.15 and Mason Valley at 86c to 80c yester-day. There was so much doing in Seven Troughs that non-listed stocks received but scant attention. but scant attention.

Bingham Standard Copper was quoted

at 18c and 20. Copper Glance at 10c and

16c and Ely Witch at 41c and 49c, while

6c was bid for Emma Copper.

Union Assay Office. M. S. Hanauer.

Some Easy Money

If you can secure a stove that will cut down your fuel bills by the economical and scientific consumption of coal. The Coles Hot Blast or the New Howard will do it. The prices are so extremely low you cannot afford to fix up the old stove.

RICH ORE FROM

SMELTER AT M'GILL.

The Lead King Mining & Milling con Montpelier, Ida., Nov. 13 .- Mining cir- pany of this city, which is mining in th section, since the Bonanza company, dated company's smelter town at McGill

ed it had been lost again.

The property of the company is located about three miles back of the McGill ranch, but as the company sells its ore to the American company, it has an arrangement by which it is permitted to load on a side track at the Steptoe Valley smelting works, which is only about a mile from the mine. The company is taking out only such ore as makes in the development work being done on the Morning Star and Grey Eagle claims. On these claims shafts have been put down but neither of them is over eighty feet deep. On each there are great blow-outs of mineral and, as near as it is possible to

Altogether, everything looks mighty see them get squeezed. Calumet & Ari-bright for the mining men of this vi-zona was the other weak stock, declining 5 points on small sales. Instead of improving, general sentiment seems to be getting more pessimistic and the short interest is increasing. Do not sell at these levels, but buy good stocks for in-

The Cumberland-Ely company has decided to allow its options on six claims adjoining the Jupiter group to lapse, and the owners were informed of the company's intentions this morning, says the Ely Mining Expositor.

The Challenge claim, owned by Newton Boyd, is included in the list which the Cumberland-Ely people have declined to buy. This property was bonded by George E. Gunn, formerly general manager of the Cumberland-Ely, two years ago, and the final payment on the property was due on the 25th of this month. Thomas Rockhill and W. B. Graham, the owners of the Aurora group, con-Thomas Rockhill and W. B. Graham, the owners of the Aurora group, contiguous to the Challenge mine, have also received word from the management of the Cumberland-Ely to the same effect. This group was bonded at the same time that the Boyd property was taken over, and several payments have been made. The last installment, aggregating about \$20,000, would fall due Nov. 25.

Although the last payments on these properties are not due for seventeen days, Chandler & Quayle, attorneys for the Cumberland-Ely, decided that it would be advisable to notify the owners of the ground at this date. Their object in so doing was to give the Ely people an opportunity to arrange for the performance of the annual assessment work on these six claims.

SEVEN TROUGHS

MINING STOCK EXCHANGE. Management of Camp's Bo-

that the deal was off.

"Tuesday morning," said Mr. Mangum yesterday upon his arrival from Denver with his business associate, "Mr. Friedman wired to the superintendent of the mine to begin sacking ore for shipment. If the purchasing crowd had offered \$3,-000,000 for the property the next minute after their option had expired they would have been turned down. During the pendency of the option, which called for \$1.87½ a share for 400,000 shares, no attempt had been made to ship from the property. Development work has been steadily progressing, however, and the shaft is now down to the 500-foot level. We have not yet had time to open the vein at that depth, but it will be tapped

When ow have the ore developed on the law sys.

When the Ish-grade streak, which varies in the kead which varies in the kead own. That is found that the wead on the law sys do sit to skip or the time that the first payment would not on the same to stake a substantial promotes.

The business would be too risky.

The reason that an option was given on the amount of stock mertioned was, Mr. Mangum said, because the owners of the time the hought it would be a granted. The law sys on the same that the time thought it would be specified to take a substantial promotes. The business would be too risky.

The deal for 400,000 shares of stock in the same around a carload of ore ever sold for before but we cannot afford to do that. The business would be too risky.

The teach the law sys developed with the cross-cut during the next few

IN THE GRANITE MOUNTAIN

Samples of ore from a new opening on the properties of the Granite Mountain Mining & Development company near Dol-ly Varden, beyond the Utah-Nevada state Mining & Development company near Dolly Varden, beyond the Utah-Nevada state line, reached the local offices yesterday. The rock came from a point 500 feet north of where the first development work was done and, while it was not considered that it would run very high in silver, lead and gold, Manager Richard Stingley stated that it was the right kind of stuff and that, when some depth had been attained, he expected it to average up with the best of the high-grade ore that had been opened 500 feet farther south on the lode.

The ledge at the pont where the samples came from is about forty feet wide and a hole five feet deep had disclosed the rock sent in. It indicates that ore is going to be continuous in the ledge for the distance of 500 feet at least, but the management is just as sanguine as though development had proven it that ore body after ore body will be found for the full 3,000 feet that the claims of the company cover the mammoth outcrop of the ledge. Mr. Stingley says that the finances of the company are in good shape and that work will be continued throughout the winter, no matter what happens to the money market. He expects more samples in from the mine during the next few days and believes that even better rock than that which has been received will follow.

MANAGING DIRECTOR OF UNITED STATES CO. HERE

Managing Director A. F. Holden of the United States company, came in from Denver yesterday after a trip to the Real Del Monte properties in Mexico. Mr. Holden expects to remain here for several days looking into the affairs of his company, particularly as they relate to the opening up of the Kempton property at Bingham and conditions surrounding the smelting works. Of the latter he states that it will be impossible to know just what is to be done until the mandate of the circuit court of appeals has been handed down. The question of finding another site for the copper smelter, in case removal becomes necessary, will be considered during his stay, as will other matters of particular moment to the company. Before going away he may have some important news to give out, but there was problem becomes received to disquest for publications. portant news to give out, but there was nothing he cared to discuss for publica-

TWO MORE COMPANIES READY FOR BUSINESS

The Elkhorn Gold & Copper Mining company of Ogden filed articles of incorporation with the secretary of state yesterday. The capital stock is \$50,000, with shares at 10 cents each. The company owns claims in the Sierra Madre pany owns claims in the Sierra Madre district, Box Elder county. The officers are: S. W. Cragun, president; M. S. Poultor, vice president, and Carl Allison, secretary and treasurer.

The Croff Mining company of Eureka, which owns claims in the Lincoln district, Beaver county, also filed articles with the secretary. The capital stock of the company is \$50,000, with shares at 10 cents each. The officers are: A. N. Wallace, president: George B. Greenwood.

Wallace, president; George B. Greenwood, vice president; Lawrence Blackett, secretary and treasurer.

Mining Notes.

Twelve carloads of ore from Utah mines were released from the Pioneer sampler There was released from the Taylor & Brunton sampler yesterday five carloads of ore from Utah mines and thirteen from

Manager J. M. Reynolds of the Hecla company's properties in Beaver county, is at the mine preparing for the shipment of another carload of ore. Manager Grant Snyder of the Cliff Min-ing company's properties at Ophir, states that 1,700 tons of ore were marketed dur-ing the past month, while an entirely new ore body farther west in the property than was ever previously prospected, has been tapped. The drills have bored their way fifty feet into it so far, but its limits are yet a matter of speculation entirely.

way fifty feet into it so far, but its limits are yet a matter of speculation entirely.

Colonel James L. Hackett of the Ohio-Kentucky and Prince Mining, Milling & Smelting company, with mammoth properties at Ploche, left for his home at Louisville, Ky., yesterday noon. Colonel Hackett has been out a month this trip and will likely not show up again until after the first of the year. He is pardonably proud of the manner in which the ably proud of the manner in which the properties of his companies are forging to the front.
